The Industrial Liaison Program (ILP) is industry's most comprehensive portal to MIT, enabling companies worldwide to harness MIT resources to address current challenges and to anticipate future needs. The ILP helps company executives monitor MIT research developments, identify MIT resources of interest to member companies, arrange expert face-to-face meetings with MIT faculty, and advise members on research sponsorship and technology licensing opportunities.

Over 200 of the world's leading companies partner with the Industrial Liaison Program to advance their research agendas at MIT.

ILP member companies account for approximately 54% of all single-sponsored research expenditures and corporate gifts/grants at MIT (FY12).

Arrange private meetings with MIT faculty

Organize private workshops/conferences at MIT

Arrange visits by MIT faculty to your company

Engage MIT faculty in collaborations

Access KnowledgeBase of MIT research projects

Connecting Industry to MIT

With 300+ research centers and 3,000+ faculty and research staff at MIT, targeting people and projects relevant to your research needs can be overwhelming. For over 60 years, the Industrial Liaison Program has provided expert navigation of MIT's vast resources. Our team of Industrial Liaison Officers have cultivated strong, working relationships with MIT faculty, and we continuously monitor the latest lab news, research and technology developments. We know the Institute. Let us connect you to the expertise, talent and technologies that can make a difference in your company.

Faculty Interactions

Face-to-face discussions with MIT faculty and researchers are the most highly valued service the ILP provides, as these interactions often sow the seeds of successful collaborations. The ILP actively advocates your company's research and strategic agenda on campus, and secures substantive meetings with key faculty and researchers. Your Industrial Liaison Officer (ILO) provides continuity and serves as the facilitator to move discussions along and work with both your representatives and faculty to enable mutually beneficial outcomes.

ILP-arranged meetings are recognized by time-pressured faculty as being highly professional, yielding high-caliber discussions and highlighting potential partnership opportunities.

Your ILO, a veteran MIT insider, and well-briefed on your company's needs and objectives, is perfectly positioned to advocate your agenda on campus, quickly identifying and engaging the interest of relevant faculty.

Meetings may be combined into half-day or full-day visits, at your company's discretion. If meeting face-to-face is difficult, your ILO may arrange an interactive video conference webcast or telephone conference call.

In addition to small, one-on-one meetings, another option for company members is engage MIT in an Executive Planning or Research Briefing/Conference for Management. Your ILO can organize a one-day private seminar at MIT for up to twenty of your senior corporate staff. These private, customized executive briefings are often used to enhance strategic planning, to examine emerging research and technology, or to consider new management approaches to corporate issues.
