Workshop: Scaling AI for Business Impact

November 20, 2025 9:00 am - 12:30 pm

8:30 AM	Check-in with Light Breakfast
9:00 AM	MIT Professional Education Introduction
9:10 AM	Redefining Leadership in the Age of Agentic AI Abel Sanchez Discover how Agentic AI is transforming the way we think about leadership, delegation, and accountability. This session dives into the unique capabilities of Agentic AI compared to traditional AI and generative models, showcasing its role in driving digital transformation. Gain insights into how autonomous systems are reshaping decision-making and scaling operations, with real-world examples of organizations leveraging this technology to lead in an AI-driven world.
10:40 AM	Networking Break
11:00 AM	From Pilots to Scale: Unlocking AI's Business Value Blade Kotelly Learn how to transform AI from a promising concept into a scalable driver of growth and efficiency. This workshop offers a practical framework for large enterprises to staff effectively, choose the right starting points, and navigate the phases of AI adoption with confidence. Learn how governance, alignment, and adaptability play a critical role in ensuring AI systems remain trustworthy and resilient. Explore supervisory frameworks like SuperAI to maintain oversight and checks as AI evolves. By balancing innovation with execution and vision with governance, your organization can harness AI as a powerful tool for long-term competitive advantage.
12:30 PM	Networking Lunch
